BUILDING MATERIALS
Suitable for:
- Cable Trays
- Metallic Service

DESCRIPTION
- fischer TDW is ceramic based technology of bio-soluble vitreous fibres and flexible organic builders and has been designed to maintain the compartmentalization of a fire rated assembly.
- The unique design of the fischer TDW allows for movement of services, maintain the necessary insulation of the services and prevent temperature rise of the services at the cold face. At normal temperature the TDW remains flexible and permits thermal and mechanical movement.
- Tested to BS EN 1366-3 and BS 476 Part 20 the fischer TDW can provide up to 2 hours integrity & insulation.

INSTALLATION
Note: Firestop material must be installed in accordance with detailed instruction or the approved system:
1. Clean all contact surfaces so they are free from loose debris and contaminants such as oil, dirt, grease, wax, old sealant etc.
2. Measure and mark the TDW to the required service configuration.
3. Cut TDW as per requirements with a standard pair of scissors or snips.
4. Wrap TDW around service configuration and apply alufoil tape to secure in place.
